- Payum-Allpay
- Payum-Mypay
- Payum-Collect
- Payum-Ezship
- Etc.

如何整合 Laravel & Maghead

所需知識

- Laravel Container
- Service Provider
- Maghead

```
class MagheadServiceProvider extends ServiceProvider
{
    /**
     * Bootstrap the application services.
     *
     * @return void
     */
    public function boot()
    {
        Bootstrap::setup($this->app['maghead.config']);
    }

    /**
     * Register the service provider.
     */
    public function register()
    {
        $this->mergeConfigFrom(__DIR__.'/../config/maghead.php', 'maghead');

        $this->app->singleton('maghead.config', function ($app) {
            return ArrayConfigLoader::load(
                $app['config']['maghead']
            );
        });
    }
}
```

composer require maghead/laravel-bridge

其實不用這麻煩！

Live Demo

感謝 OpenSource 開發者

Thanks
